Summary

Systems administrator with nearly two years of hands-on experience managing Windows and Linux environments, network security, and end-user support. Experienced with Microsoft 365 (Exchange Online, Entra ID, SharePoint, Teams), Active Directory, DNS and DHCP, firewall and VPN configuration, SIEM/XDR monitoring, Veeam backup and recovery, and PowerShell, Python, and Bash automation. Comfortable resolving escalated issues independently, documenting environments thoroughly, and communicating clearly with clients during high-pressure incidents.

Technical Skills

- **Microsoft 365:** Exchange Online (mailboxes, mail flow rules, spam filtering), Entra ID, SharePoint Online, Teams
- **Identity & Directory:** Active Directory, user provisioning, access control
- **Networking:** DNS, DHCP, VPN (L2TP, Sophos Connect), RDP, WAP placement, network troubleshooting
- **Backup & Recovery:** Veeam (vSphere VMs), Veeam Vault, disaster recovery basics
- **Network Security:** Sophos Firewall, Sophos EDR/XDR, endpoint security
- **Monitoring & SIEM:** Wazuh, security event and log monitoring
- **Automation:** PowerShell, Bash, Python, Windows scheduled tasks
- **Operating Systems:** Windows Server, Debian, Ubuntu, Arch Linux
- **Virtualization:** VMware vSphere, VirtualBox, Proxmox homelab
- **Encryption:** BitLocker, PGP
- **Ticketing & Documentation:** GLPI, GitHub
- **Hardware:** PC and server-class hardware construction and maintenance

Languages: Python, Rust, Bash, PowerShell **Markup:** LaTeX, HTML, CSS, R Markdown

Job Experience

IT Site Administrator - Rollins Data Systems

March 2025 to Present

Nationwide caging and donor relations company

- Administer IT infrastructure day to day, regularly working across 50+ servers running Windows Server and Linux (Arch, Debian, Ubuntu), including Active Directory, and handling escalated support issues promptly.
- Configure and maintain network security using Sophos Firewall, Sophos EDR/XDR, and Wazuh for log and security event monitoring.
- Troubleshoot network, VPN, and RDP problems, and support remote workers in vSphere-hosted Windows environments.
- Develop and maintain PowerShell, Bash, and Python automation, including scheduled tasks and internal Python applications, to reduce repetitive administrative work.
- Administer Microsoft 365, including Exchange Online mailbox management, mail flow rules and spam filtering, Entra ID user accounts, and SharePoint and Teams support.
- Maintain and troubleshoot DNS and DHCP across Windows Server and Sophos Firewall, resolving name resolution and address assignment issues.
- Back up vSphere virtual machines with Veeam and Veeam Vault, and maintain a basic disaster recovery process to support system recovery.
- Manage support workflow and documentation of configurations and procedures in GLPI.
- Set up physical and perimeter security, including RFID door access, security cameras, and wireless access point placement.
- Assisted with PCI redaction to support compliance requirements.
- Led emergency outreach to 350 clients during a contractor ransomware attack, using the SendGrid email API to keep communication uninterrupted.

Escrow Accountant - EngageUSA

February 2024 to March 2025

- Balanced daily books for nationwide non-profit clients, from political action committees to animal rights organizations.
- Resolved data discrepancies with the caging team, improving donor database accuracy.
- Administered payroll for a mid-sized restaurant and a political action committee, ensuring compliance with timekeeping and deductions.

Education

University of Maryland, Baltimore County

June 2019 to December 2023

B.S. in Financial Economics

Certifications

- CompTIA Security+
- CompTIA A+
- Sophos Firewall Engineer
- CompTIA Network+ (in progress)
